

mobiSigner *... Sign files on the move!!!*

All of us are fascinated with the concept of doing things on the move at our convenience. Send e-mails, surf Internet, connect with friends, and much more stuff. Now, E-Lock launches a solution that can e-sign files on the move with mobile device or PC.

Go Paperless. Go Secure.

No Downloads! No Risk!

E-Lock mobiSigner, a first-of-its-kind solution, e-Signs your PDF files directly from your mobile/PC without any downloads & installs at the client-end.

Three simple steps:

- 1) Sign in to your mobiSigner account
- 2) Select & review files to be signed
- 3) Enter your password. Your file is signed

mobiSigner can sign single file or bulk files directly on the server. mobiSigner provides organizations with the flexibility of signing documents on the move from remote locations. mobiSigner allows users to cut time delays and bring efficiency in routine processes like approvals, sales closures, signing contracts.

Major features

- eSign PDF files with WAP-enabled mobile or PC
- No downloads and installations at client end
- Workflow for contract signing
- Central storage of credential
- Supports multiple signatures
- Easy integration through web service API
